Interesting to Soldiers.

Second Comp'roller Maynard has ettled an important question arising dut of the net of April 22, 1872, which direets that every volunteer soldier who enlisted for three years prior to July 22, 1861, under the president's proclamation of May 3, 1861, and the orders of the war department issued in pursuance thereof, and was actually mustered into the service before August 6, 1861, and who was honorably discharged.shall be paid the full bounty of \$160, unless already paid. The second comptroller holds that said bounty is payable to the heirs of every deceased soldier who, if living would be entitled thereto, whether he died before or after the pussage of the act.

The Democratic party has not yet engaged to pay the public debt, but the bosses of the departments ask for trifle of \$50,000,000 more money to carry on the government than was asked by the previous administration.

The urgent deficiency bill now pend ing in the Senate contains an item of \$185,000 for the Department of Justice alone. This covers exp-aditures made during the first year of Democratic in a and no part of it is chargeable to the previous Administration. The showing is significant one, and may be studied with profit in the light of those vivid promises of retrenchment and economy with which the Democratic party entered upon the work of conducting national affairs.

The experiment of milking cows three times a day was tried at the Iowa agricultural college, and the average daily gain of the herd was four pounds, or half enough to pay for the extra trouble and expense. The increase in milk is not considered sufficient to pay for the labor and expense; even when cows yielding over tweaty quarts daily are used. The only advantage is that the cows will have to be kept in the barnyard and soiled, thereby effecting a ST. JOSEPH. MO. greater saving of manure.

President Barry stated to the West | PRACTICE ern New York Horticultural Society, that to become really profitable, apple orchards mu t have a soil, the fertility of which is to be maintained with suitable fertilizers, giving the trees a good annual growth, with judicious pruning and the destruction of noxions insects That when the fruit is well grown, it must be carefully gathered, assorted,

The New York Herald, heretofore a steady supporter of Cleveland states the situation of the President and his friends very fairly and correctly as tol-

"A Republican (General Logan) declares for the utmost publicity,-A Democratic President refuses publicity. Another Republican (Senator Sherman) says: 'There ought to be no secrets in Constipation, Loss of Appetite, Dizziness and al be secrecy—when secrecy means intrigue in the White House, intrigue in the Senate, and the injury of the people by the appointment of improper men to gratic President thinks there ought to tion in open Senate that all appointments be considered publicly; but the Democratic President and the greater number of Democratic Senators combine to prevent the people from s-eing CHICAGO and knowing how their business is carried on. Is that Demogratic? Can Mr. C.eveland stand there?"

Harper's Weekly, chief of the independent Republican papers and the ardent supporter of President Cleyeland, in a long editorial on "the first year of the administration" says, "The three the administration" says, "The three the administration of the skill and money can produce.

AN OPINION WORTH READING.

To the Editor of the Gazette :- It affords me great pleasure to be able to bear testimeny to the ability and skill displayed by Dr. W. C. Boteler, of this city, in the management of delective sight, and his attention to my own eyes in particular. The doctor adjusted and sup-plied me spectacles that are all that I could de-sire. They enable me to read clearly and easily and prosecute daily duties with comfort and satisfaction. Respectfully, SILAS WOODSON, Ex-Governor of Missouri.

An Educational Panic.

The progress of the debate on the education bill has developed two points the first being the fact that if the bill passes it will be only in the face of strenuous opposition, and the second being found in the curious circumstances that the opposition to the bill comes mainly from the Southern States, where in proportion to the population, there will be perhaps the largest expenditure of the appropriation Opposition from any quarter to such a bill is strange enough, but opposition from the South is phenomenal. Of all the members of Co. gress, from any section, the greediest in asking for, not to say scrambling for, public money to be expended in their States and districts, the Southern Representatives and Senators have been most shameless. No subterfage was too thin to conceal a demand for money; no pretext too trivial to serve as the bases of a request for more. Ports without commerce or the prospect of any were presented as worthy of appropriations; rivers which half the year were dry and the other half were navigable only by flatboats, were urged in committee meetings and before the House as deserving improvements, and any device that seemed likely to be a succe s in securing an appropriation for local benefit was hailed as a god-

But when the question was one of education, of preparing the children of the South to take a worthy part in the future politics of the country, all at once at terrible peril is foreseen "The liberties of the States are in danger;" "the object of the bill is centralization; each State should be allowed to educate its own people in its own way;" "there should be no interference by the Federal Government in the affairs of a sovereign State," and so on, through the gamut of folly and non-ense, the prote-ts continued, until one not cog nizant of the circumstances might have supposed that the provisions of the bill required the army to be sent into the South for the purpose of enforcing attendance in the schools, and that every pupil was to be accompanied to the seat of learning by an armed soldier. In view of the fact that the widest latitude of change has been allowed, and the Southern members are invited to make the bid what they would have it: that the friends of the measure have even gone so far as to propose an amendment providing that no State shall take its share of the appropriation except by a special act of the Legislature, and that all the disbursemen's, shall be by a State agent and practically in such a manner as the State may direct, nothing can silence the clamor DISEASES or allay the apparent panie at this im

aginary invasion of State rights. There must be some more substan tial reason behind the opposition of the Southern Congressmen than any yet stated, for so absurd are the reasons given that to accord them serious consideration is to reflect upon the intelligence of the Congressional representation of the South It is probable, there fore, that the explanation of the South. without which orcharding cannot be profitable.
